FOREIGN AFFAIRS *Spycraft and Statecraft*

sophisticated artificial intelligence models that can digest astronomical amounts of open-source and clandestinely acquired information so that they can make their best human judgments.

At the same time, what the CIA does with the intelligence it gathers is also changing. "Strategic declassification," the intentional public disclosure of certain secrets to undercut rivals and rally allies, has become an even more powerful tool for policymakers. Using it doesn't mean recklessly jeopardizing the sources or methods used to collect the intelligence, but it does mean judiciously resisting the reflexive urge to keep everything classified. The U.S. intelligence community is also learning the increasing value of intelligence diplomacy, gaining a new understanding of how its efforts to bolster allies and counter foes can support policymakers.

This is a time of historic challenges for the CIA and the entire intelligence profession, with geopolitical and technological shifts posing as big a test as we've ever faced. Success will depend on blending traditional human intelligence with emerging technologies in creative ways. It will require, in other words, adapting to a world where the only safe prediction about change is that it will accelerate.

PUTIN UNBOUND

The post-Cold War era came to a definitive end the moment Russia invaded Ukraine in February 2022. There spent much of the past two decades trying
