Hypothetical Values-Most Recent 10-calendar year period

Here's how the Allianz Benefit Control* Annuity might look over a 30-year period. The values show what would happen if allocations earned indexed interest using current rates in all years. The indexed interest is based on actual index performance for the most recent 10-calendar year period for the first 10 years. In all later years, we repeat the index performance from the first 10-year period.
